TO: Service Personnel

FROM: HWH Corporation

RE: Concerning Hose Identification by the print on the hose cover as:
HWH-02 HP USE 4540-30200 DIE, 4599-FP010 PUSHER
This hose was used on certain HWH room extension systems.

CONCERNING HOSE IDENTIFIED BY THE PRINT ON THE HOSE COVER AS: HWH-02 HP USE 450-30200 DIE, 4599-FP010 PUSHER

We have found that in some cases, if we have a swage leak on an HWH-02 HP hose, cutting off the existing hose end and swaging a new hose end onto the hose does not solve the problem.

Due to this situation, when an HWH-02 HP hose has a swage leak or any other problem, the complete hose assembly must be replaced. **DO NOT ATTEMPT TO REPAIR THE HOSE.**

Identify the hose by the print on the hose cover, not the part number tag at the end of each hose.

Contact HWH Corporation's Technical Service Department at 877-494-6466 prior to making any repair or replacing the hose.

Again, this bulletin applies to hose marked: HWH-02 HP USE 4540-30200 DIE, 4599-FP010 PUSHER.

Hose marked: HWH-02 HP USE 4540-3200 DIE, 4599-FP010 PUSHER will be replaced with hose marked: PARKER PARFLEX PDH-2 1/8 6000 PSI WP-USE 58 SERIES FITTINGS.
