

New! **HWH® Economy Fifth Wheel Lift System**

Available for Fifth Wheels

Includes the following features...

- Jacks are extended using an easy-to-use hand pump. No electrical power is required.
- Heavy duty springs quickly retract jacks.
- Jack lifting capacities are available in 6,000 lb., 9,000 lb., 12,000 lb., 16,000 lb. & 24,000 lb. per jack.
- Large pivoting jack foot pads allow for maximum stability.
- Same rugged construction and high-quality materials as HWH® automatic systems.
- Jacks can be used as landing gear or combined with rear jacks to make a complete leveling system.

HWH® Hydraulic System with Manual Extend and Spring Retract

The control valve assembly is equipped with a two-stage hand pump which automatically shifts from high-volume with low-pressure to low-volume with high-pressure. This provides rapid extension of the landing gear. The hand pump can also be used to extend or retract any HWH® room extension mechanism. The economy Hydraulic Fifth Wheel Lift System is inexpensive, fast and reliable. Contact HWH® to get yours today.

Taking you to the next level.
